

Preliminary version

Please do not redistribute!

These collections are preliminary versions intended for review purposes only.

The final version will be freely available to everyone soon.

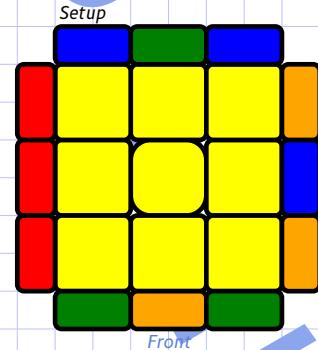

I would like to gather some opinions on the following:

- Is the presentation of the algorithms clear and understandable?
- Is the selection of algorithms appropriate?
- Would it be of interest to generate collections with many more algorithms?
- What could be added to improve this collection of algorithms?

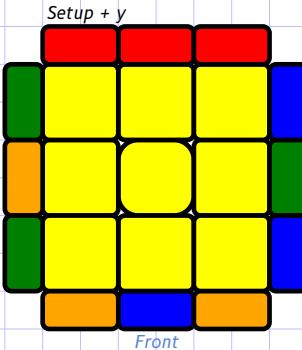

You can write to me at grvigo@hotmail.com
